

A LEGACY OF SUCCESS

For over 25 years, Martin Audio's Blackline Series has set the global benchmark for affordable professional loudspeakers.

Renowned for exceptional sound quality and reliability, Blackline has become the go-to choice for live venues, nightclubs, and installations around the world.

The latest series - BlacklineX - has consistently been successful, but after 8 years, the time is right to introduce its successor.

TWO-WAY LOUDSPEAKERS

BLACKLINE 

BlacklineQ two-way loudspeakers feature symmetrical, multi-angle enclosures in 8", 10", 12" and 15" models, finished in toughed black paint.

New Improved Features include:

Differential Dispersion horn flare for improved coverage, consistency and control

User-rotatable horn flare with easier grille removal via screws

Additional accessories including cost effective yokes and transit covers

The Martin Audio Experience

FIRST IN PRICE POINT CLASS TO FEATURE DIFFERENTIAL DISPERSION

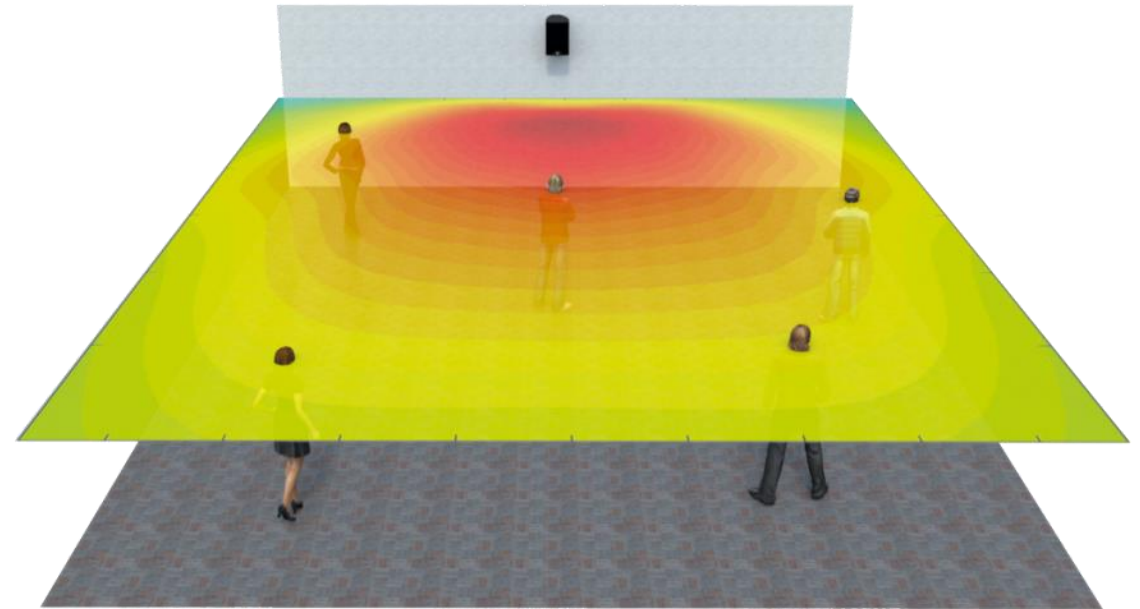

BLACKLINE 

Conventional 2-way loudspeaker coverage

Hot spot directly in front, with weaker coverage further out and to the side. To compensate, sometimes more loudspeakers with overlapping coverage are required.

BlacklineQ Differential Dispersion pattern

Rectangular, consistent coverage pattern that is highly efficient for install and portable live sound. Also reduces energy to ceiling.
